

## Watershed Counts Fall Meeting Agenda

**Monday, October 6, 2014**

1:00 PM - 3:00 PM at Save The Bay

1. Welcome
  - a. Welcome – Nicole Rohr and Tom Borden
  - b. Introductions
2. Presentation - EPA Urban Waters Grant - Alicia Lehrer and Denise Poyer
3. 2014 Watershed Counts Report - Discuss the 2014 Report and suggested improvements for next year
4. 2015 Watershed Counts Report - Discuss the possible focus and topic to be highlighted in the 2015 Report. For initiating a discussion, one possible approach is to focus on our connectivity to urban waters. This would allow a focus on some critical issues: how urban water quality is critical to the health of the Bay, how climate change will impact urban waters, public health issues with fish advisories and historic contaminants, fish migration opportunities, stormwater and green infrastructure opportunities and challenges in urban settings, public access to waterfront, what Providence and Fall River and other urban centers are planning for integrating waters in urban redevelopment and economic development, case studies on how other urban areas have addressed these issues, etc.
5. 2015 State of the Watershed – Overview of the Narragansett Bay Estuary Program's proposed indicators for a State of the Watershed report
